

Disruptive technologies

Final Exam Project

Spring 2026

Embracing Disruptive Technologies: Lessons from Industry Leaders

Students are asked to explore how famous organizations or industries have leveraged disruptive technologies to innovate, adapt, and thrive in an ever-evolving business landscape. By examining real-world examples, students will gain insights into the strategies, challenges, and outcomes associated with integrating disruptive technologies into established frameworks.

Some specific companies and industries that have effectively utilized disruptive technologies:

1. Tesla Inc. (Automotive Industry):

- Tesla revolutionized the automotive industry by introducing electric vehicles (EVs) powered by advanced battery technology.
- Disrupted traditional automotive manufacturing and distribution models by selling directly to consumers and offering over-the-air software updates.

2. Netflix (Entertainment Industry):

- Netflix disrupted the entertainment industry by pioneering the subscription-based streaming service model.
- Utilized data analytics to personalize content recommendations and produce original programming, challenging traditional TV networks and cable providers.

3. Amazon (Retail Industry):

- Amazon transformed the retail industry with its e-commerce platform and streamlined logistics network.
- Introduced disruptive technologies such as AI-powered recommendation engines, drone delivery, and cashier-less stores (Amazon Go).

4. Airbnb (Hospitality Industry):

- Airbnb disrupted the hospitality industry by creating a peer-to-peer marketplace for short-term lodging rentals.
- Leveraged digital platforms and user-generated content to offer unique accommodations and experiences, challenging traditional hotel chains.

5. Uber (Transportation Industry):

- Uber revolutionized the transportation industry with its ride-hailing app, providing an alternative to traditional taxis and public transportation.
- Leveraged GPS technology, mobile payments, and dynamic pricing algorithms to offer convenience and affordability to riders.

6. SpaceX (Space Exploration Industry):

- SpaceX disrupted the space exploration industry by developing reusable rocket technology and reducing the cost of space travel.
- Challenged established players like NASA by offering commercial launch services and pursuing ambitious goals such as colonizing Mars.

These companies and industries serve as excellent examples of how disruptive technologies have reshaped traditional business models and created new opportunities for innovation and growth.

Project Requirements:

Date and Time: The final exam presentations will take place on **May 13, 2026. At the normal lecture time of your group.** (allocated time slots will be shared with you before this date).

Deadline for Moodle submissions: May 13, 2026.

Please ensure that you are available during this time to deliver your presentation.

Group Size and Composition: Each group should ideally consist of “**3:5 students**”.

Format: Each group will be allocated [**10 minutes**] to present their work.

Each group is asked to choose one of the above-mentioned organizations, that has effectively utilized disruptive technologies to transform their operations and market presence, analyzing the following:

- 1- Identify and describe the disruptive technologies employed by each organization or industry.
- 2- Explore how these technologies have reshaped traditional business processes, and customer experiences.
- 3- Assess the impact of disruptive technologies on various aspects, highlighting successes, failures, and lessons learned.
- 4- Explore the future trajectory of disruptive technologies within the selected organization.

Rubrics for Evaluation:**1- Depth of Analysis: (25%)**

Thoroughness in identifying and analyzing disruptive technologies and their impact on the selected organizations or industries.

2- Clarity of Presentation: (25%)

Clear and concise presentation of findings, supported by relevant data, examples, and visuals.

3- Critical Thinking and Insights: (25%)

Demonstration of critical thinking skills in evaluating strategic initiatives, outcomes, and future implications.

4- Preparation and Creativity: (25%)

Originality in identifying unique perspectives, insights, or solutions.

Good luck!
